+54 93517619943 • Córdoba, Argentina

SUMMARY

Frontend Software Engineer with 3 years of professional experience building scalable web and desktop applications using React and TypeScript. Strong background in state management, API integration, performance optimization, and reusable component architecture. Backend-capable with experience in Node.js and PostgreSQL, enabling efficient frontend–backend collaboration and reduced API overhead. Experienced working in international remote teams and delivering production-ready systems.

PROFESSIONAL EXPERIENCE

Odaclick / Exomindset - Córdoba, Argentina

Frontend Developer – Universo Tickets Desktop App

Jun.25 – Present

Company Web Site • Store

- Led the frontend development of a production desktop ticketing system used by physical box office agents as part of an integrated event sales ecosystem (backoffice platform, online store, and PDA validation app).
- Designed and implemented modular UI architecture using React and TypeScript, building reusable components for high-frequency transactional flows.
- Developed complex sales workflows including authentication, ticket selection, cart management, dynamic pricing, filtering systems, delivery/return flows, and cash register closing modules.
- Integrated REST APIs using React Query with caching strategies to optimize data synchronization and reduce redundant network requests.
- Created reusable custom hooks and structured a scalable service-layer architecture for API communication.
- Focused on UI consistency and usability using Material UI within an Electron-based desktop environment.
- Implemented thermal printer integration, generating pixel-perfect PDF tickets and handling hardware communication within the Electron environment.

Tech: React, TypeScript, Electron, React Query, Material UI.

Game Programmer – Rift Zone: Contact

Nov.24 – Jun.25

Company Web Site • Video Game Web Site

- Developed and implemented core game systems, including authentication for Android and iOS, NFC security, localization, cloud services (GCP) for authentication and mobile deployment configuration, and user interface components.

Farmacia Alto Palermo - Córdoba, Argentina

Full Stack Web Developer – Freelance Project

Oct.24 – Nov.24

Company Web Site

- Designed and developed a full-stack administrative platform for managing customers and healthcare plans.
- Built secure authentication flows and implemented complete CRUD operations for client and plan management.
- Designed RESTful APIs using Node.js and Express, connecting a React-based frontend with a PostgreSQL database.
- Implemented a transactional points accumulation and redemption system tied to customer data records.
- Managed the full development lifecycle independently, from database design to deployment.
- Handled deployment and environment configuration using cloud hosting services (Netlify, Railway).

Tech: React, Redux, JavaScript, Reactstrap, Node.js, Express, PostgreSQL, Sequelize.

Getback - Santiago, Chile
Full Stack Web Developer
Mar.23 - Oct.23
Company

- Contributed to the development of a reverse logistics SaaS platform used by e-commerce businesses to manage product returns and exchanges.
- Built and maintained multi-step transactional forms embedded into client websites for return/exchange processing.
- Developed administrative dashboards for operations tracking, customer management, and return workflow monitoring.
- Integrated third-party platforms such as VTEX, WooCommerce, and WordPress to extend return automation capabilities.
- Debugged production issues using API inspection and structured logging with Winston, reviewing logs in AWS CloudWatch to identify and resolve backend and integration errors.
- Collaborated in QA and testing processes to ensure system reliability and smooth user experience.

Tech: React, TypeScript, JavaScript, Redux, Node.js, Express.js, PostgreSQL, Sequelize, VTEX, WordPress, WooCommerce.

ADDITIONAL INTERNATIONAL SOFTWARE EXPERIENCE

SuperBytes - Barcelona, Spain
Game Programmer - Taitiko
Oct.23 - Sep.24
Company Web Site • Video Game Web Site • Store

- Worked on AI behaviors, networking, REST API communication, and UI systems.

Landell Games - Linköping, Sweden
Game Programmer - Apoceus
Jul.23 - Nov.23
Company Web Site • Video Game Web Site • Store

- Worked on gameplay systems, bug fixing, performance optimization, and UI interactions.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, React Query, Redux, HTML, CSS, Material UI, Electron, Tailwind, Bootstrap, React Native.

Backend: Node.js, Express.js, PostgreSQL, Sequelize.

Other: Unity, C#.

Tools & Workflow: Git, GitHub, Bitbucket, CI/CD (Netlify, Railway), Postman, Scrum, Linear, pgAdmin 4.

Cloud & Deployment: Netlify, Railway, Vercel, GCP (basic).

EDUCATION

- Full Stack Web Developer - Henry Bootcamp - 2022 (Certification).
- Bachelor's Degree in Music Composition – National University of Córdoba – 2018 (Certification).

LANGUAGES

- English: Advanced (Certification) | Spanish: Native
