SUMMARY

Software Engineer with 3 years of professional experience building scalable web and desktop applications across frontend and backend environments using React, TypeScript, Node.js and PostgreSQL. Experienced developing production-ready SaaS platforms, operational dashboards, REST APIs, and database-driven systems while collaborating with international remote teams. Strong background in full-stack systems architecture, reusable UI, authentication flows, deployment workflows, and real-world product iteration. Currently expanding expertise in testing practices, cloud technologies, and AI-powered application features through LLM integrations.

PROFESSIONAL EXPERIENCE

Farmacia Alto Palermo - Córdoba, Argentina

Full Stack Software Engineer – PharmaCare CRM

Oct.24 – Present

[Company Web Site](#)

- Designing and developing an ongoing full-stack pharmacy CRM platform used for chronic patient follow-up and treatment renewal management in a real pharmacy operation.
- Built patient management workflows, prescription tracking systems, follow-up boards, operational dashboards, notifications, authentication flows, and REST APIs using React, TypeScript, Node.js, Express, Sequelize, and PostgreSQL.
- Responsible for the complete software lifecycle including requirements analysis, database modeling, frontend/backend development, deployment, and continuous product iteration based on operational feedback.
- Implemented JWT authentication, role-based access control, drag-and-drop workflows, dashboard KPIs, reusable UI architecture, and relational database design.
- Deployed production environments using Vercel and Railway while managing environment configuration and application maintenance.

Tech: React, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express, PostgreSQL, Sequelize, JWT, Railway, Vercel.

Odaclick / Exomindset - Córdoba, Argentina

Frontend Software Engineer – Universo Tickets Desktop App

Jun.25 – Apr.2026

[Company Web Site](#) • [Store](#)

- Owned the frontend development of a production desktop ticketing system used by physical box office agents as part of an integrated event sales ecosystem (backoffice platform, online store, and PDA validation app).
- Designed and implemented modular UI architecture using React and TypeScript, building reusable components for high-frequency transactional flows.
- Developed complex sales workflows including authentication, ticket selection, cart management, dynamic pricing, filtering systems, delivery/return flows, and cash register closing modules.
- Integrated REST APIs using React Query with caching strategies to optimize data synchronization and reduce redundant network requests.
- Created reusable custom hooks and structured a scalable service-layer architecture for API communication.
- Focused on UI consistency and usability using Material UI within an Electron-based desktop environment.
- Implemented thermal printer integration, generating pixel-perfect PDF tickets and handling hardware communication within the Electron environment.
- Contributed to a Next.js-based admin dashboard by implementing a new reporting page for print history, including data table rendering and filtering logic.

Tech: React, TypeScript, Electron, React Query, Material UI, Next.js.

Game Programmer – Rift Zone: Contact

Nov.24 – Jun.25

[Company Web Site](#) • [Video Game Web Site](#)

- Developed and implemented core game systems, including authentication for Android and iOS, NFC security, localization, cloud services (GCP) for authentication and mobile deployment configuration, and user interface components.

Getback - Santiago, Chile

Full Stack Web Developer

Mar.23 - Oct.23

[Company](#)

- Contributed to the development of a reverse logistics SaaS platform used by e-commerce businesses to manage product returns and exchanges.
- Built and maintained multi-step transactional forms embedded into client websites for return/exchange processing.
- Developed administrative dashboards for operations tracking, customer management, and return workflow monitoring.
- Integrated third-party platforms such as VTEX, WooCommerce, and WordPress to extend return automation capabilities.
- Debugged production issues using API inspection and structured logging with Winston, reviewing logs in AWS CloudWatch to identify and resolve backend and integration errors.
- Collaborated in QA and testing processes to ensure system reliability and smooth user experience.

Tech: React, TypeScript, JavaScript, Redux, Node.js, Express.js, PostgreSQL, Sequelize, VTEX, WordPress, WooCommerce.

ADDITIONAL INTERNATIONAL SOFTWARE EXPERIENCE

SuperBytes - Barcelona, Spain

Game Programmer – Taitiko | Oct.23 - Sep.24

[Company Web Site](#) • [Video Game Web Site](#) • [Store](#)

- Worked on AI behaviors, networking, REST API communication, and UI systems.

Landell Games - Linköping, Sweden

Game Programmer – Apoceus | Jul.23 - Nov.23

[Company Web Site](#) • [Video Game Web Site](#) • [Store](#)

- Worked on gameplay systems, bug fixing, performance optimization, and UI interactions.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, JavaScript, React Query, Redux, Next.js, HTML, CSS, Material UI, Electron, Tailwind, Bootstrap.
- **Backend:** Node.js, Express.js, PostgreSQL, Sequelize, REST APIs, JWT Authentication.
- **Testing:** Vitest, React Testing Library.
- **Tools & Workflow:** Git, GitHub, Bitbucket, Postman, Scrum, Linear, pgAdmin 4.
- **Cloud & Deployment:** Railway, Vercel, Netlify, AWS (basic), GCP (basic).
- **Other:** Unity, C#.

EDUCATION

- Full Stack Web Developer - Henry Bootcamp - 2022 ([Certification](#)).
- Bachelor's Degree in Music Composition – National University of Córdoba – 2018 ([Certification](#)).

LANGUAGES

- English: Advanced ([Certification](#)) | Spanish: Native
